

Integrated Project on Food Security, Disaster Risk Reduction and Climate change Adaptation in Jumla / Mugu Districts

Area Coverage

Khatyad (Mugu) Kanaka Sundari
Patarasi , Hima (Jumla)

Karnali Province

Sector

Food security, Climate change,
Livelihoods

Project Period

15 December 2019 to 30th Sep 2023

Participants

1580 Households

Funding Partners

CARITAS Germany/ Nepal

Target groups

17 cooperatives and 43 community
group and 4 local government,
Emergency Operation Centers and
Local Disaster Management
Committees

Budget : 12343426

Euro 1,021,658

Introduction

The project entitled “Integrated Project on Food Security, Disaster Risk Reduction (DRR) and Climate Change Adaptation in Jumla and Mugu Districts of West Nepal”, (INFO,DRR/CCA Project) in Jumla, Mugu district of west Nepal”, has been implemented with the financial support of Caritas Germany and technical support from Caritas Nepal and implementation partnership with PACE Nepal. The program started in 15 December 2019 and will end in 30 June 2023

The project activities have been implemented in six rural Municipalities and one municipality (Kanakasundari, Hima, Tila, Tatopani, Patarasi, Khatyad and Chhayanath rara Municipality) of Jumla and Mugu district, targeting 17 cooperatives and 43 community group. More than household: youth, group member, cooperative member, cooperative management team have been directly benefiting from this project through capacity building approach for sustainable

livelihood. The overall objective of the project was improved resilience of the poor and marginalized communities of Jumla and Mugu districts of Nepal. The project improved resilience of the poor and marginalized communities of Jumla and Mugu districts of Nepal. The primary beneficiaries of the project are, most vulnerable families especially those with limited capacity to cope with the current situation women headed households, Dalits, indigenous people, single women, disabled, disaster affected, and socially and economically excluded families and Victims by 10-years civil war (the proposed district have been severely affected by the 10 years’ of Maoist insurgency. The impact of civil war still remains with the victims and they have not been able to fully recover their losses).

There were various activities conducted such as fruits orchard management training to build capacity for cultivation, nursery establishment of seasonal and off seasonal/seed plastic house distribution for commercial vegetable farming, distribution of potato seeds for indigenous potato promotion, Mushroom production training for the promotion of mushroom cultivation for sustainable livelihood for landless

people, Agricultural Farmer Field School Ward level orientation Program for (IPM) FFS to enhance their knowledge and skills motivate them to grow crops locally and to support modern/traditional agriculture system. Training on off season vegetable Production and Seed production of major potential was conducted in order to enhance their knowledge and skills, to motivate them to grow crops locally, help in diversifying their nutrition and promote seed production. Apple sapling plantation was conducted with the aim of utilizing the marginal land and to check the landslide and soil erosion. Potato farmer field school was organized to make the participants competent by enhancing their ability to analyze and make decisions through participatory exercises based on experiential learning. Simunlation, first aid training for capacity buid in disaster prepaidness,4 palikas DPRP,LDCRP 3 palika safe construction policy. Another major activity is monthly meeting of cooperatives, Cooperative audit support & support organized annual general assembly in order to make them financially independent. The awareness program was completed on the occasion of international earthquake day, Environment day and woman day celebration.

Trace forming, NTFP plantation was conducted with the aim of utilizing the marginal land and to check the landslide and soil erosion. Potato farmer field school was organized to make the participants competent by enhancing their ability to analyze and make decisions through participatory exercises based on experiential learning. Simunlation, first aid training for capacity buid in disaster prepaidness, DPRP prepaidness workshop,Ward level intrction meeting for task formation, Mason training, LEOC opration intraction meeting, Check damp, Retrofetting , water renovation, Another major activity is monthly meeting of cooperatives, Seed bank promotion training, seed bank business plan development training, Cooperative audit support & cooperative account keeping

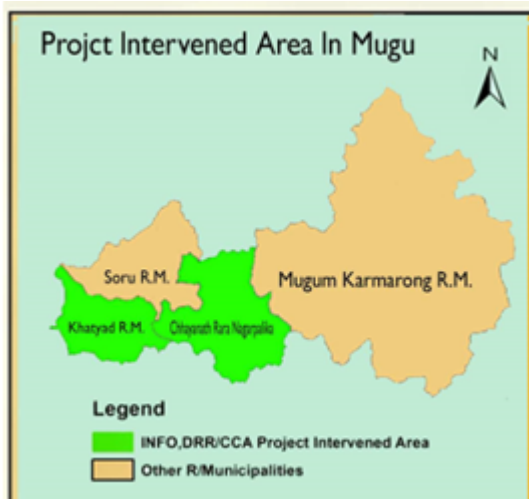

training and learning shearing meeting in order to make them financially independent. The awareness program was completed on the occasion of international earthquake day, Environment day and woman day celebration.

PACE Nepal collaborates with Emergency Operation Centers and Local Disaster Management Committees (LDMCs) to develop and implement integrated disaster risk management plans and strategies. This includes the formation of community first responders and task force members and risk assessment and watershed level assessment planning. The DRR component successfully formed Ward disaster management committees (WDMCs) and local disaster management committees (LDMCs) in all of INFO, DRR/CCA project working municipality and strengthened their capacities with Disaster risk reduction and management and access to information platforms to respond to and mitigate local shocks and stressors. During the quarter, some achieved under the DRR/CCA Component which are as follows.

Project Contributes to Sustainable Development Goals (SDGs)

Project Goal

The people of Jumla and Mugu districts live more dignified lives in improved and Much sustainable environment.

Objective

To improve resilience of the poor and Marginalized communities of Jumla and Mugu districts of Nepal.

Results

1: Improved and diversified food production and livelihoods through Sustainable agriculture practices and natural resource management.

2: Enhanced local capacities to cope with natural and climate induced Hazards.

3: Strengthened organizational capacity and outreach of the 12 stng

Key Approaches

- CSO engagement and capacity building
- Multi-stakeholder partnership
- Right targeting and inclusion through Climate Vulnerability and Capacity Analysis
- Collaboration with LGs Right-based approach
- Upstream-downstream linkage Climate field school
- School climate change education Local Capacity Building
- Local capacity building

Major Activities

- Nursery establishment seasonal and off seasonal, seed plastic house distribution.
- Plastic House Support
- Distribution of Potato seeds for Local potato promotion
- Ward level orientation for Farmer Field School for (IPM) FFS)
- Potato Farmer field school session
- Farmer field school
- Mushroom Production and Promotion Training
- Training on off season vegetable Production and Seed production of major potential
- Motivation training to lead farmer for commercial vegetable farming
- Training on Family nutrition, personal hygiene and local production promotion training
- Disaster risk reduction & climate change Adaptation training
- Awareness on Disaster Risk Reduction's and Climate Change related Act, policies and guidelines
- Mason Training conducted on Earthquake resistant technics
